Required Narrative Questions

Questions 1: Why do you want to be an ASBA elected officer?

ASBA can be a very positive force for the education of Arizona's future.

Questions 2: What unique capabilities do you bring to the ASBA Executive Officer Team, and how would you use them for the benefit of ASBA and its members?

I am a fifth generation Arizonan and have a very vested interest in the success of the children of Arizona.

I was raised by an English teacher, who taught at nearly every level of education in Arizona. I have lived in Asia and have first hand experience with those methods and ideas of education. These experiences have given me a greater appreciation for the American education model and the importance of local governance.

I have served as a school board member for seventeen years and with ASBA as a legislative advocate and legislative committee member for most of my tenure.

I have worked with school board members and legislators from across the state in effort to improve education for all of Arizona's children.

Questions 3: What leadership experience have you demonstrated on your board in your district community (elevating the voice of your community and district, leadership on policy, leading advocacy work locally, etc)?

I have served as board president for more than a decade. Our board works well together for the success of our students. We consistently have graduation rates at or near 100%.

Our board mission involves supporting the families and community that are the strength behind our students successes.

Questions 4: ASBA has a diverse membership. What would you do to ensure we are meeting as many of our members' needs as possible?

It is important to understand and meet the needs of each student. This is best accomplished by locally elected board members.

ASBA's role is to provide the training and support to board members throughout the state to help them achieve their local goals

LOCAL CONTROL is paramount.

Questions 5: From your perspective and involvement with ASBA, what opportunities do you see; for example professional development, member service, advocacy, etc?

ASBA needs to support local boards through training, policy services and advocacy with legislators while concentrating on the primary goal of providing a quality education for the children of Arizona.

Questions 6: What is your perspective with the term "Equity"? As a leader of ASBA how would you advocate this term in relationship to student academic/vocational success?

All students need to be given the opportunity to receive an education that will allow them to be successful in their chosen vocation as well as opening their minds to new opportunities and adventures.
